

Preface

A comprehensive exercise has been commissioned by Small Farmers' Agri-Business Consortium in assessing the extent of achievements under MM-II in terms of expansion of area, production and productivity of fruits, vegetables, floriculture and spices Physical verification of beneficiaries on random basis to see the activities have also been carried out districts level across the 11 states covered by the programme. The prevailing system of identification of farmers including processes followed, overall impact of the programme in terms of increase in income level of target beneficiaries, quality of life, reduction in migration, occupational diversification, adoption of new and/or sustainable technologies will be studied to suggest improvement/modification in these programme. The physical and financial target suggest large involvements of beneficiaries through various projects and schemes with various simultaneous exercises being undertaken to find solutions for marking of horticultural produce, organic certification and mechanization for running programmes for sustainability of economic growth and empowerment of women farmers segments with new workable delivery models in the North Eastern and Hilly States under HMNEH. The overall exercise is expected to bring results in meaningful improvements in implementation of the programmes. A suitable design for Managements Information System(MIS) at District, State and National levels envisages collection, and preparations of a data base of beneficiaries covered under XI Plan. The MIS system data base could readily accessed by stake holders at Central and State

The cumulative physical targets and achievements since inception of the Mission (2001-02 to 2011-12) has been brought out in this Annual Report.

We are thankful to Secretary (Agriculture & Cooperation), Additional Secretary (HMNEH), Horticulture Commissioner, Addl. Commissioner (Hort) for their guidance to SFAC in implementation of the Mission. We are also thankful to officers and staff of Horticulture Division of Department of Agriculture & Cooperation for their commendable support and cooperation.

Managing Director

Dr. Gorakh Singh
Horticulture Commissioner
Government of India
Ministry of Agriculture
(Department of Agriculture & Cooperation)
Krishi Bhawan, New Delhi – 110001

Message

I am extremely happy that Small Farmers' Agri-business Consortium is bringing out an Annual Report 2011-12 of Horticulture Mission for North East and Himalayan States (HMNEH). It is a compilation of activities and few success stories under HMNEH States.

North East and Himalayan region with its favourable climatic conditions has emerged as one of the important Horticulture hub of the country. The region has successfully demonstrated its strength in commercialization of production of fruit crops like banana, khasi mandarin, pineapple, apple, passion fruit, kiwi, strawberry; and vegetables like capsicum, tomato, cabbage, cauliflower; flowers like roses, anthurium, gerbera, orchids, lilium, tulips; spices like ginger, turmeric and aromatic plants like patchouli, aloe vera, etc.

Implementation of HMNEH has helped in achieving horticulture led transformation in the region especially in generating sizeable revenue as well employment avenues particularly to unemployed youth and women in a big way.

Some of the success stories in indicate are establishment of vegetable villages in Nagaland, rose and tomato villages in Sikkim, rose and strawberry villages in Meghalaya, kiwi clusters in Arunchal Pradesh, passion fruit clusters in Manipur, scion blocks under green house in Mizoram, tissue cultured banana clusters in Assam, rejuvenation of apple & Litchi in Jammu & Kashmir, Himachal Pradesh and Uttarakhand.

Dr. Gorakh SinghHorticulture Commissioner

Contents

CHAPTER 1 Overview

epartment of Agriculture & Cooperation is implementing a Centrally Sponsored Scheme "Horticulture Mission for North East and Himalayan States (HMNEH)" for overall developments of horticulture in a mission mode approach. The mission consists of four mini missions which individually address specific goals and cover entire spectrum of horticulture right from production to consumption thought backward and forward linkages.

The mission consists of four mini missions:

MINI MISSION- I Relates to production and supply of quality seed and planting material, generation, standardization and refinement of technology, on-farm demonstration, training, etc.

MINI MISSION-II Relates to increasing production and productivity of horticulture crops by adoption of improved production technologies.

MINI MISSION-III Relates to creation of efficient post harvest managements and marketing infrastructure.

MINI MISSION-IV Relates to setting up of new processing units, up gradation and modernization of exiting processing units.

THE major planned activities under the mission are as below:

- ❖ Technology generation, refinement and on farm demonstration.
- Setting up of nurseries, tissue culture units for production of quality seed and planting material.
- ❖ Area expansion with improved and high yielding varieties.
- ❖ High density planting and canopy managements of orchards.
- * Rejuvenation unproductive orchards.
- Protected cultivation to improve productivity and to grow off season vegetables.
- Organic farming for capitalizing niche market.
- Creation of water resources.
- Bee-keeping for pollination.
- Mechanization to bring efficiency and competence.
- Creation of post harvest managements and marketing infrastrure.
- Processing and value addition.
- Capacity building of all stakeholders.

Mini Mission II

A consolidated picture of the physical and financial progress during 2011-12 under the Horticulture Mission for North East and Himalayan States is placed at **Annexure II & III** respectively. A summary thereof is as under:

A total of 55953 ha **additional area** was covered under different against the target of 58620 ha adopting improved technologies. It was 95% of physical targets and 96% of financial targets. States leading the progress were Assam, Mizoram, Nagaland, Sikkim and Jammu & Kashmir. Two integrated mushroom units were set up in Manipur. Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Himachal Pradesh were leading States with respect to Bee-keeping programme and 33358 **bee colonies** and 6592 **equipments** were created against the target of 32943 and 6592 respectively under this component.

Development of **Water Sources** was taken up by all the States and 2760 units were developed out of 2807 (98%) during the year. However, on an individual basis, the States of Arunachal Pradesh, Assam, Mizoram, Nagaland and Tripura States achieved 100% of the targets set. On farm water management programmes were taken as per the needs of the State. 1142 ha mulching, 39500 Sq. Mtr. Plastic/low cost tunnel and 999962 Sq. Mtr. antihail nets were achieved. The programme was taken up by all States except Arunachal Pradesh, Manipur, Mizoram, Tripura and Jammu & Kashmir.

Perhaps the most important component under MM II is the **production of good planting material**. Steps were been taken in the establishment of nurseries, both in the public as well private sector; to ensure supply of good planting material. The progress in the setting up of nurseries was as follows:

Sector	В	ig	Small		
	Target	Ach.	Target	Ach.	
Private	18	16	81	82	
Public	78	71	37	47	
Total	96	87	118	129	

On an average, 101% of the physical targets was achieved.

The programme envisaging **transfer of technology** was also taken up on a large scale to bridge the gap in the knowledge of horticulture technologies developed and dissemination awareness of the same among extension agencies and the farmers. While 70536 were trained with the District, 73201 were trained within the State and 43896 were trained outside the State and 17 were trained outside India against the targets of 75268, 74004, 43896 and 22 respectively. Assam, Meghalaya, Mizoram, Nagaland, Tripura achieved full targets. This component was lagging behind in Himachal Pradesh and Uttarakhand. Therefore, their programme in horticulture development may suffer in the future.

The benefits of **organic farming** have now been realized. 3692 earthworm units were developed against 3692 units (100%) to promote organic farming and 2516 ha area was covered against the target of 2620 (96%) under organic horticulture. 101 **certification unit** for organic horticultural produce could be established against a target of 103 and Sikkim is one of the leading State.

Mechanization in horticulture is considered an important tool for increasing labour efficiency and productivity. Despite the geographical terrain, achievement of States aggregated 109% for power operated equipment. The leading States were Arunachal Pradesh, Manipur, Meghalaya, Mizoram, Nagaland, sikkim, Tripura, Himachal Pradesh and Jammu & Kashmir.

The **integrated pest management** system has established its significant importance for horticultural crops to control/reduce the pesticide residue in the produce. This technique is being popularized in all the States. An area of 63600 ha out of 64079 ha was covered under **Integrated pest Management** and under 8800 ha were covered under **Integrated Nutrient Management**, 7 **disease forecasting units** out of 9 and 1 **Centre of Excellence** were established.

136 out of 140 seminars, several review meetings and awareness programmes were organized.

Mini Mission III

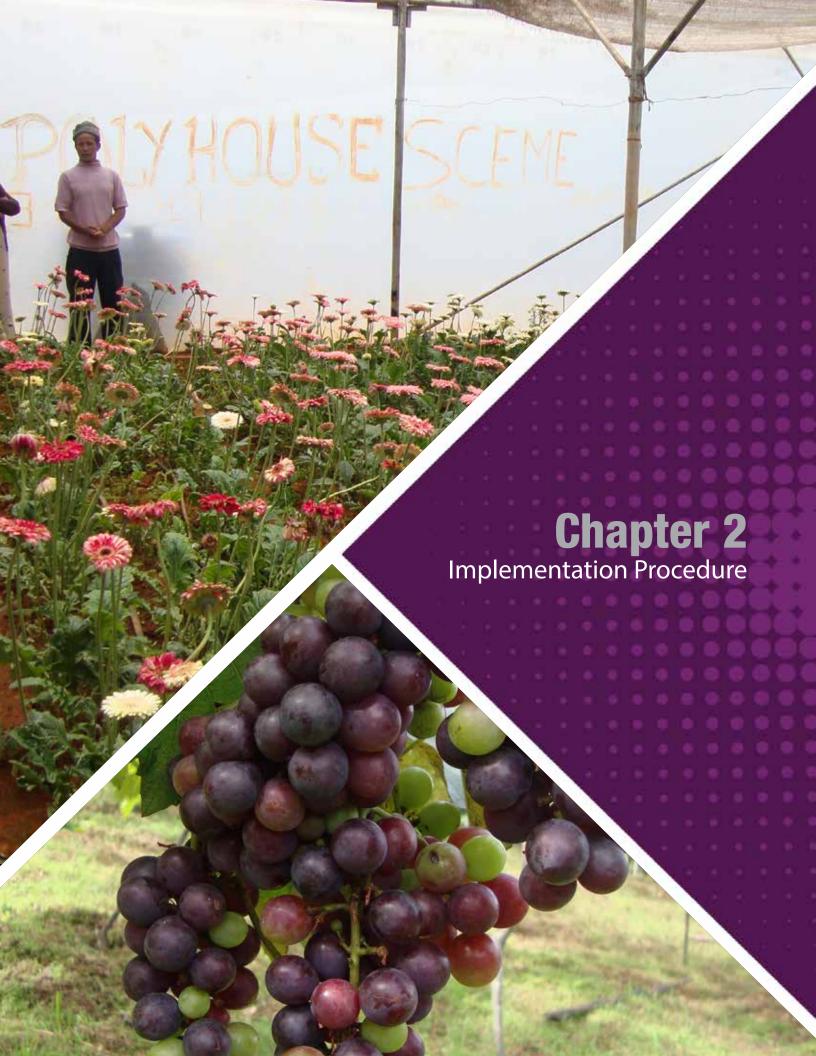

During the year **1 Wholesale Market** in Uttarakhand **21 Rural Primary Markets** (13 in Mizoram and 8 in Nagaland) were sanctioned an amount of Rs.78.75 lakhs and **1 Apni Mandi** in Nagaland were sanctioned an amount of Rs.3.75 lakh as **second and final installment**.

Mini Mission IV

During the year, a total of **Eight new processing units** (1 each in Assam and Nagaland [NER] 3 in Himachal Pradesh, 1 in Jammu & Kashmir and 2 in Uttarakhand [HS]) was sanctioned for an amount of Rs. 604.56 lakhs by MFPI. Second and final Installment was sanctioned to **Nine units** (one in Assam [NER] and 1 in Himachal Pradesh and 7 in Uttarakhand [HS]) for an amount of Rs.1754.96 lakhs by MFPI.

CHAPTER 2 Implementation Procedure

Approval of Programmes

The project proposals related to research should be submitted to DG (ICAR) through concerned Nodal Officers of Mini Mission - I for approval.

State will prepare yearly work plan/action plan or Annual Action Plan (AAP) within the parameters of the Mission and submit the same to the Horticulture Mission Cell at Department of Agriculture & Cooperation. The AAP should be accompanied with project report of each district and it should reflect consolidated approach at state level. The work plan/action plan should have assessment of export potential and detail quantification of all inputs and outputs. AAP needs to be supported with data/write up on outcome of past interventions covering the details of area expansion (variety introduced, increase in productivity achieved and number of clusters created), water resource development as per felt need of the State (amount of irrigation potential created, whether linked with micro irrigation, maintenance, etc.), INM/IPM (including infrastructure created and how these are being utilized for benefit of the farmers) and organic farming. Area expansion should be determined based on the availability of quality seed and planting material.

Proposals on marketing should be submitted in prescribed format to DMI, Ministry of Agriculture, Government of India through SFAC and the proposals on Post Harvest Management should be submitted directly to NHB in a similar prescribed format. The proposals appraised by DMI/NHB will be submitted to DAC for approval by the Central Subcommittee of MM-III (post harvest management and marketing). Horticulture Mission Cell will examine the proposal further for directing SFAC/NHB to release the funds.

Proposals on processing should be submitted to MFPI through concerned State Implementing Agency.

Fund Flow Mechanism

The funds for Mini Missions-II, III and IV (except to designated agencies like NHB, NBB for capacity building in Agriculture/ Horticulture, etc.) will be routed through SFAC for further release to respective State Level SFAC of the States concerned. Funds of Mini Mission - I will be directly released to Nodal Officers (Mini Mission - I) of ICAR institutes.

The DAC would release funds to Central SFAC, NHB and ICAR based on approved Annual Action Plans. Central SFAC would further release these funds to State level SFACs/ Director (Hort./Agri.) of respective States immediately within 15 days of receipt of the funds from DAC as per physical

and financial targets approved. On the directions of Secretary (Hort./Agri.)/ Director (Hort.)/ Nodal Officer of the State for implementing Horticulture Mission, the State level SFAC/ Director (Hort./Agri.) would release funds to District Hort./Agri. Officer. The District Hort./Agri. Officer would further release funds, as far as possible through cheques, to beneficiaries identified in the district on the basis of approved work plan (based on district project report). Even in case of big projects, as far as possible, funds will be routed through District Hort./Agri. Officer, to facilitate post disbursement inspection. The District Hort./Agri. Officer would facilitate beneficiaries in procurement of planting material, organic manures, equipments, etc.

Monitoring Mechanism

At National Level the implementation of all the four Mini Missions are being regularly reviewed and monitored by a Central Steering Committee headed by Secretary (A&C). In addition the Mini Mission wise programmes are being reviewed and monitored by concerned Steering Committees headed by DG (ICAR) for MM-I, Additional Secretary (DAC) for Mini Mission - II and III and Secretary (MFPI) for Mini Mission - IV.

At State level, the programmes are being reviewed and monitored by State Level Steering Committee headed by Chief Secretary of concerned States.

National agencies Involved in Implementation of the scheme

A. Indian Council of Agricultural Research (ICAR)

All the research project proposals including production of nucleus seed and planting material, Human Resource Development are being taken up by ICAR through its concerned Nodal Officers.

B. Small Farmers' Agri-Business Consortium (SFAC), New Delhi

- SFAC will interact with State Governments/State agencies to obtain their views on the programmes
 of the Mission and it may suggest modifications in policies or scheme parameters for consideration
 of DAC.
- ii. SFAC will obtain quarterly progress reports from State level agencies, consolidate them and send to Horticulture Mission Cell at DAC. SFAC will obtain utilization certificates from concerned agencies and forward them to the Horticulture Mission Cell at Department of Agriculture & Cooperation. SFAC will also give statements on utilization of funds regularly and audited certificates at the close of each financial year in GFR-19.
- iii. SFAC will ensure ground level monitoring of the Scheme and record their observations in quarterly progress reports sent to Horticulture Mission Cell.
- iv. Each State will prepare an annual report giving details of the programmes implemented under the Mission and benefits accrued to the State and provide it to Horticulture Mission Cell with the list of beneficiaries along with their names, addresses and details of funds provided to them and for the purpose. The Central SFAC within 3 months of close of the year after collection of the annual reports from the respective states would compile a consolidated report mentioning the performance of the scheme and its role as an implementing agency. The consolidated annual report would be made available to the Horticulture Mission Cell in DAC within the stipulated period of 3 months after close of the financial year.
- v. In addition to its role of monitoring and sending quarterly progress report to Horticulture Mission Cell, DAC, SFAC will also act directly as an implementing agency for any component of the Mission programme on request of DAC.

- vi. The funds for Mini Mission II and III (except to designated agencies like NHB) will be routed through SFAC for further release to concerned agency/State level SFAC of the respective states. The SFAC will be paid service charges @ 0.5% of the funds routed through it.
- vii. Under Mini Mission III, Director Horticulture of the State, would prepare projects which after the approval of State Level Steering Committee would be appraised by NHB/DMI/SFAC on the basis of suitability of locations and economic viability.
- viii. Projects proposals under Mini Mission IV would be sent by the respective State Governments to the MFPI with a copy to DAC. The MFPI's Project Approval Committee would approve the proposal and would recommend it for funding through SFAC.

C. National Horticulture Board (NHB), Gurgaon

All the project proposals relating to Post Harvest Management (except those relating to marketing infrastructure) will be received in the prescribed format (Annexure-II) by the NHB from the State Governments. It would appraise these proposals and advice the DAC accordingly.

D. Directorate of Marketing & Inspection (DMI), New Delhi

DMI would be responsible for appraisal of all the proposals regarding setting up of marketing infrastructure for horticulture produce received from the respective State Governments in the prescribed format and would advice the DAC. In addition to this it would also provide market intelligence and be responsible for monitoring of all programmes relating to marketing of horticulture crops.

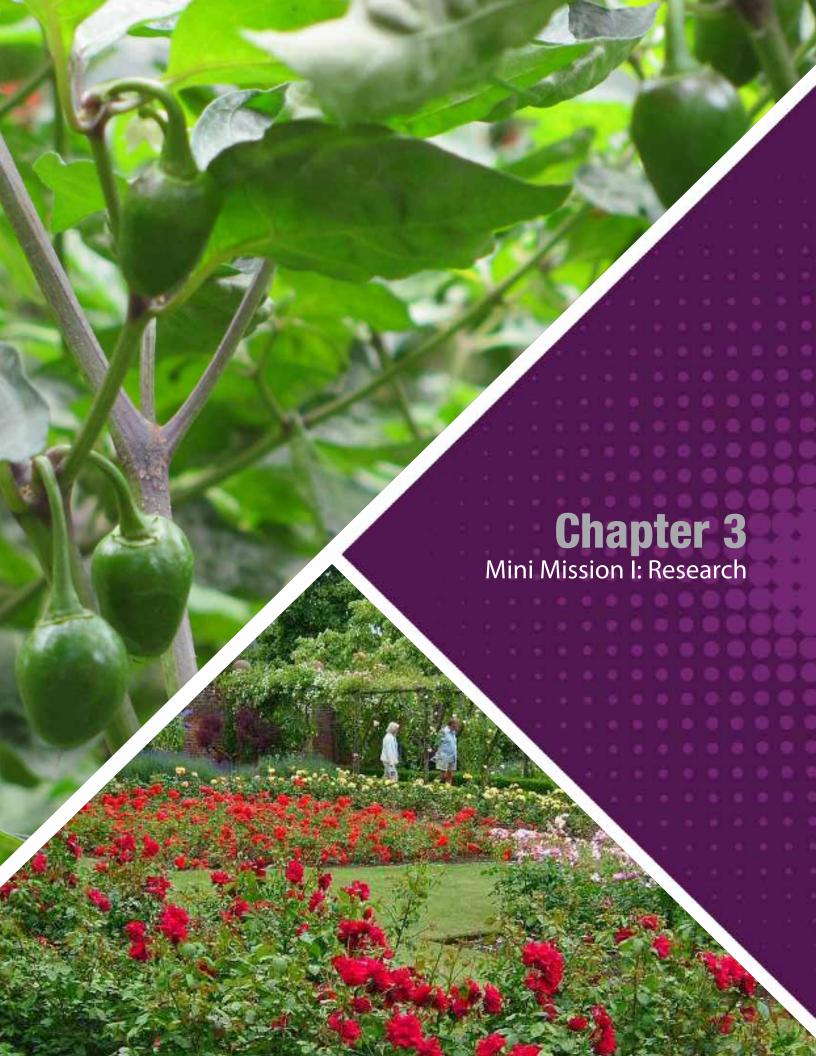

E. Ministry of Food Processing Industries (MFPI)

All the project proposals relating to processing will be received by MFPI through concerned State Implementing Agencies. MFPI's Project Approval Committee would approve proposals for funding under HMNEH.

F. Other Ministries

Departments associated in implementation of various programmes under HMNEH are Ministry of Panchayat Raj, Department for Development of North Eastern Region (DONER), APEDA, NCDC, NBB, etc.

CHAPTER 3 Mini Mission I: Research

The Mini Mission wise progress of implementation of programmes under HMNEH during 2011-12 are as under:

Mini Mission I (Research)

This mission concentrates on technology generation appropriate to the region. The major components are production and supply of seed and planting material, technology, standardization and refinement specific to the region and on farm demonstration and training. The programmes are being under taken by ICAR Nodal Institutes' namely

- i. NRC for Orchids, Sikkim covering all the North Eastern States
- ii. CPRI, Shimla for Himachal Pradesh
- iii. Vivekananda Parvatiya Krishi Anusandhan Sansathan, Almora for Uttarakhand
- iv. Central Institute of Temperate Horticulture for Jammu & Kashmir

The Institute wise progress of achievements made during 2011-12 are given as under:

1. National Research Centre for Orchids, Sikkim A i) Production of nucleus/basic seeds and planting material of horticultural crops.

S.No.	Category	Type of planting materials	Target	Achievement	% of Achievement
1.	Fruits Crops	Plantlets/Suckers/Grafts/ Cuttings/Seedlings/Layers (Nos.)	830100	556167	67.00
2.	Vegetables Crops	Seed/Minituber (Kg.)	1125.5	1677	149.00
		Cuttings/Microplants (Nos.)	25000	49250	197.00
		Spawn (Pkts.)	7500	2250	30.00
3.	Flowers Crops	Cuttings/Suckers/ Psedudobulbs/Bulbs/ Corms (Nos.)	414350	377058	91.00

S.No.	Category	Type of planting materials	Target	Achievement	% of Achievement
		Seeds (Kg.)	3	1.6	54.00
4.	Plantation and spices crops	Rooted Cuttings/Seedlings/ Seednuts/Slips/Air layers (Nos.)	142200	48348	34.00
		Rhizome (Q)	135	45.9	34.00
5.	Medicinal and Aromatic crops	Cuttings/Slips (Nos.)	231000	140910	61.00

ii) Establishment of Mother blocks for bud-wood production (AAU, Jorhat Centre)

Crops	Variety	2011-12				
		Targets	Achievements			
Arecanut (Seedlings)	i. Mohitnagar ii. Mangala iii. Sumangala iv. Srimangala v. Kahikuchi	1 block at AAU Jorhat + 1 block at RARS, Buraliksan	Target achieved. Two Arecanut mother blocks are established. One at AU, Jorhat and one at RARS, Buraliksan.			
Banana	Tall Cavendish	2 blocks at AAU, Jorhat & at RARS, Buraliksan	Target achieved. Two mother blocks, of banana are established. One block at AAU, Jorhat and one block at RARS, Buraliksan.			

iii) Establishment of Rootstock bank (AAU, Jorhat Centre)

Crops	Variety	2011-12				
		Targets	Achievements			
Citrus (Cuttings, Seedlings)	Assam lemon Rough lemon Khasi mandarin	1 block at AAU, Jorhat	One block of citrus is developed at AAU, Jorhat for establishment of rootstock bank, Plants are at vegetative growth stage.			

iv) Establishment of Rootstocks bank (CAU, Imphal Centre)

S.No.	Crops	Location
1.	Citrus	2 Rootstock banks established at Horticultural Research Farm (HRF) Andro, CAU, Imphal, Manipur) with 6 rootstocks vars"Rich 16-6, X-636, Karnakhata, Pumello, Champra lleithm, Trifoliare are being maintained at present.

v) Establishment of Bud wood bank (CAU, Imphal Centre)

S.No.	Crops	Location
1.	Citrus	Khasi mandarin in Arunachal and Tamenglong mandarin in Manipur established at HRF, Andro.
2.	Pineapple	Queen, Matritius and Kew at HRF, Andro.
3.	Banana	4 (Meitei Hei, Dwarf Cavendish, Maring llei and G-Naine) varieties of budwood bank established and are at fruiting stage at present.

B. Standardization of Improved production and protection technologies for horticultural crops.

- ❖ In high density planting of peach, three low chilling varieties of peach. Partap, Shan-e-Punjab and Floradasun were planted at a spacing of 2 x 2m. The no. of fruits per plant was recorded highest in Shan-e-Punjab (135.7) followed by Pratap (107.5) whereas, lowest in Floradasun (59.9). The Pratap (58.90 g) recorded maximum fruit weight followed by Floradasum (44.3g) whereas, lowest in Shan-e-Punjab (36.6g). The yield was recorded highest in Pratap (6.31 kg/tree) followed by Shan-e-Punajb (4.96 kg/tree) and lowest in Floradasum (2.65 kg/tree). (Barapani centre).
- While studying the establishment of agro techniques for strawberry, runners from field were transplanted into poly bags. While transplanting into polybags, three different pruning treatments were imposed such as pruned up to two leaves, four leaves and un-pruned and executed with and without dipping in bavistin solution (2gm/l). It was recorded that pruning upto two leaves along with Bavistin dip treatment showed better survival better survival rate and early establishment by four leaves (A.P. Centre).
- Rejuvenation techniques of Khasi mandarin were studied. Various treatments were included like Pruning and training, correction of soil p11, integrated nutrient management, integrated management of trunk borer and bark cating caterpillar, integrated management of disease & integrated weed management.
 - Soil pH, organic carbon increased after treatment of the plants in all the treated plots. The weed population, incidence of insect pest and diseases were reduces in all the treated plots (CRS, Tinsukia).
- The development of packages of practices for organic ginger was studied. The experiment was set on randomized block design with six treatments viz., T1; Vermicompst (VC: 2.5 t/ha), T2: Poultry manure (PM; 1.25 t/ha). T3; Swine manure (SM: 3.0 t/ha), T4: control and replicated thrice to study the effect of applied organic nutrients on growth and yield attributes of ginger. The growth performance was recorded higher under the VC followed by PM but crop is yet to harvest, (A.P. Centre).
- The production technology of mushroom was standardized. The addition of rice bran recorded stimulatory effect on Pleurotus sajarcaju. The sporophore appeared within (19.50 days) after spawning. The other yield parametes, viz., weight of sporophore (474.00g) and biological efficiency (95.8%) were also significantly high in rice bran supplementation. (A.P. Centre).
- The effect of NPK on growth and flowering of Chrysanthemum var. Carnval Pride were studied. The treatments include different ratios of N, P and K at 3 levels each of 10 g/m³, 20g/m² & 30g/m². Among different treatments, NPK with (30:20:20g/m²) resulted

- in better growth and flower character; namely plant height (40.10 cm),no. of branches/plant (34.33 no.), flower no./plant (244.33 no.) and flower duration (44.33 days). (AAU, Jorhat).
- While studying the performance of different anthurium cultivators like Fire, Tropical, Calore, Moments, Acropolis Agniotri, IAHS-1, Sweet Heart, Cherry Red & Sunset Orange under agro shade net for Assam conditions. Among the different varieties, Acropolis resulted in better growth & flower characters. Maximum leaf size (18.4 cm x 10.6 cm), early flowering (100 days), flower size (8.0 cm x 6.0 cm) was revealed in Acropolis. Whereas, Moments produced highest plant height (48 cm) & flower no. (2.0). (AAU, Jorhat).
- While studying the suitable dose of organic and biofertilizer for growth and flowering of gerbera var. Red Gem. Out of the 9 treatments, Enrich compost @ 10t/ha was superior in growth and flower characters. Namely, plant height (51.66cm), leaf no. (52), carly flowering (59.40 days), flowers no./plant 937.60), stalk length (56.50 cm), flower size (9.54 cm), flower duration (19.80 days) vase life (9.20 days). (AAU, Jorhat).
- While evaluating the organic fertilizer as a source of nutrient for Cymbidium, maximum no. of new shoot (2.78) and no. of back bulb were recorded from the plants treated with Bone meal. Similarly more no. of leaves (62.78), no. of psedudobulb (6.33), plant height (69.78cm) and leaf length (67.55 cm) were found in the plants treated with Pushkal (20N) + Biopotash + Megacal. (NRCO, Pakyong).
- Thirteen locally collected pepper accessions for growth and yield was evaluated. It was observed that the highest yield (4.7 kg/vine) was obtained in KKHP-3 (4.5kg/vine) after 6 years of planting. (CPCRI, Kahikuchi).
- ❖ Out of the different coconut varieties/hybrids under North East conditions, I.O x COD recorded maximum trunk height (2.55m), COD x WCT possess maximum collar girth (1.44m), WCT x GB produced maximum annual leaves/palm. All the varieties and hybrids started flowering on 6th year of planting. COD x WCT recorded the highest no. of spadices (5.33); Spadi initiation and flower opening still continuing. WCT x GB recorded the highest no. nut yield/palm (23) on 7th year of planting. (CPCRI, Kahikuchi).
- ❖ The comparative performance of area hybrids along with parental lines under North East conditions was done. The results revealed that after 4th year of planting, Sumangala performs better in terms of seedling height and collar girth (3.84m and 46.63 cm, respectively) and Hirehalli Dwarf with respect to annual leaves production (3 no.). Among the hybrids, Sumangala x HD recorded the highest seedling hight (3.36m) and collar circumference (46.75cm) HD x Sumangala recorded maximum (3.08 no.) annual leaf production. (CPCRI Kahikuchi).

C. Technology refinement and imparting training to extension functionaries

S.No.	Type of planting materials	Target	Achievement	% of Achievement
1.	On campus & Off campus training	254	76	30.00
2.	Demonstrations	232	133	57.33

Besides, 10 field visits, 2 exposure visits, I television programme along with farmer's field day, workshops, horticulture show and other extension visits are running alongside of the training and demonstration activities.

2. Central Potato Research Institute (CPRI), Shimla, Himachal Pradesh

A i. Production of nucleus/basic seeds and planting material

The details of seed and planting material produced and distributed to State Government are as under:

Crops	Target	Achievement	% of Achievement
Fruits

Details of crop wise targets & achievements of vegetable crops (2011-12)					
Crops	Target	Achievement			
Capsicum	120 kg + 50000 seedlings	125.0 kg. + 3990 seedlings			
Brinjal	41 kg + 50000 seedlings	45.0 kg. + 3500 seedlings			
Tomato	4 kg + 50000 seedlings	4.5 kg. + 4296 seedlings			
Chinese Sarson	300 kg				
Cauliflower	63 kg + 25000 seedlings	10100 seedlings			
Chinese Cabbage/Cabbage	50 kg + 25000 seedllings	10162 seedlings			
Broccoli	35 kg				
Cucumber	25 kg.	25.0 kg.			
French bean	900 kg.	890.0 kg.			
Okra	550 kg	800.0 kg.			
Onion	95 kg.				
Garden pea	1700 kg.				
Radish	220 kg.				
Turnip	120 kg.				
Carrot	25 kg.				
Beat leaf/Palak	125 kg.				
Other cucurbits	55 kg.	60.0 kg + 7650 seedlings			
Spinach	250 kg.				
Total Seed (kg.)	4678	1949.5			
Seedlings	200000	39718			
Potato microplants/I (no.)	8000	9240			
Microtubers	32000	9477			
Minitubers (no.)	32000	649			

Targets & achievements of spice crops & flowers/ornamental plants (2011-12)					
Crops	Target	Achievement			
Plants/annuals/rooted cuttings/rooted plants (no.)	65000	65143			
Bulbs/bulbous plants (no.)	16350	15831			
Seed (kg.)	20.5	19.60			
Total Plants/bulbs etc.	81350	80974			
Seeds Kg.	20.5	19.6			

Targets & achievements of medicinal plants production during (2011-12)					
Crops	Target	Achievement			
Chilli	60 kg + 50000 seedlings	60 kg.			
Garlic	2500 kg.				
Ginger	1500 kg.	1800 kg.			
Methi	915 kg				
Turmeric	3500 kg.	6000 kg.			
Coriander	110 kg.				
Large Cardamom	200 plants				
Total Seed (Kg.)	8585 kg.	7860 kg.			
Seedling/plants (no.)	50200				

B. Standardization and refinement of production and protection technology

- 1. Hot water treatment in combination with *Trichoderma* soil application (@2.5kg/50kg FYM/ha) proved most effective in limiting the soft rot of ginger caused by *Pythium* spp.
- 2. Ten models [(1) Walnut +peach + marigold, (2) Walnut +peach chrysanthemum, (3) Walnut + pomegranate + broccoli, (4) Plum + peach+ tomato, (5) Plum+ pomegranate + Strawberry, (6) apple + pomegranate + cauliflower, (7) Reetha + Alove vera, (8) Aonla + Nectarine, (9) Aonla + Galgal & (10) Pecan nut + Guava high density plantation] have been planted during the current year.
- 3. Visual indexing was done at 20 locations of district Shimla and 3 locations in district Kinnaur, DAS-ELISA was performed on 40 isolates from 8 cultivators, three viruses i.e. ACLSV, ASPV, ASGV were recorded. 795 plants of commercial cultivators were screened against the target of 200 plants.
- 4. Scion wood from elite mother plants, were maintained at IARI farm at Shimla, after serological indexing for ACLSV, ApMV, ASGV and ASPV. Five varieties out of 17 varieties from Rohru region & 8 varieties out of 28 varieties from Kullu region were found free from virus. Eight soil samples were collected for isolation of Arbuscular mycorhyzal fungi (AMF).
- 5. Six treatments/ modules were evaluated against fruit flies in tomato, cucumber and bottle gourd. The treatment comprises of sanitation, mass trapping of males, cover sprays with Azadarechtin (0.4 %) at 10 days interval, followed by malathion (0.1 %) + sugar (1%) and cypermethrin (0.0075) was found best.

- 6. Six botanical extracts were tested against oviposition, eggs and larval stages of cut worm (Agrotis sp.) and white grubs in which Neem seed kernel and soapnut extracts in cattle urine found effective.
- 7. Technology for lactic acid fermentation of vegetables (radish and carrot) was optimized. 2.5% salt + 2% mustard & 2.5% salt + 1.5% mustard were found best for lactic acid fermentation of carrot and radish, respectively.
- 8. Artificial short days provided by using black polythene and tarpaulin showed bud formation in the month of July and flowering during August in 8 commercial cultivators.
- 9. Eight fungisides were tested against powdery mildew (Sphaerotheca pannosa) & black spot (Diplocarpon rosae) of rose. Difenconazole was found effective for powdery mildew and mencozeb + carbendazim for management of black spot. Soil solarization with transparent polyethylene mulch (100gauze thick) was found effective for the management of wilt (Fusarium oxysporum). Prophanifos (0.1%) provided effective management of mite in carnation and rose.
- 10. Modified MS medium with increased level of NH_4No^3 (25.7mM) and supplemented with GA_3 (0.58 μ M) as well as NAA (0.1 μ M), used for improving morphological growth characteristics of recalcitrant potato cultivator Kufri Jyoti
- 11. French and African marigold were evaluated and 80 crosses of French marigold and 5 crosses of African marigold were done. Seventeen selections of Antirhinum and 15 selections of Pansy were maintained, crossed and nursery of the lines and the hybrids has been raised.
- 12. Domestication of bumble bees in refined wooden domiciles to enhance the success of bumble bee rearing and utilization this technology to meet the increasing need of pollinators in open as well as protected cultivation of crops.
- 13. Field survey of different Apiaries (Kullu, Bilaspur, Hamirpur, Solan districts) conducted at monthly interval, revealed that percent infestation of *Varroa destructor* increased from 2010-2011 and from the month of August it started decreasing.
- 14. Refined growing media (Vermicompost: soil (2:1) + neem manure (250 gm/m²) + Trichoderma (10 gm/m²) + crucifer leaves + biofertilizers) gave better results for soil borne diseases in sweet pepper.
- 15. Evaluation of different cultivators of Lillium for commercial cultivation parameters is in progress.
- 16. Maximum population of white fly in poly house during second week of June (1542.21adults/trap) indicating a positive correlation with temperature. Imidacloprid was most effective followed by acetamiprid. ESSO (summer oil) showed compatibility with acetamiprid. Beauveria bassiana provided 76.7% control at 10⁸ conidia/ ml.
- 17. Parthenium, Lantana and Pinus were as substrates for cultivation of medicinal mushroom. Calcium oxychloride & sodium hypochlorite in the concentration of 4 & 5% were found effective for sterilization of substrates. Polypropylene bags and bamboo baskets were successfully used for cultivation of medicinal mushrooms.
- 18. Six cultures of AMF, 6 isolates of fungal antagonists and 3 isolates of bacterial antagonists were purified from soil samples of bearing apple orchards at Shimla, Kinnaur, Kullu, and Sirmour districts. Talc based formulations of fungal and bacterial antagonists were prepared.
- 19. The seedlings of kalazira were used for *in vitro* shoot multiplication and callus formation. Shoot was found best explant amongst leaf, stem, shoot, cotyledon, is which gave 100% callus initiation.
- 20. Seven districts of HP covering 81 locations against a target of 20 locations were suveyed and *Melolontha* sp, *Brahmina coriacea* and *Holotrichia logipennis* were observed as important species. Carbofuran3G or chloropyrophos20EC providing 80-100% mortality.
- 21. Analysis of substrates for preparation of fortified FYM has been done.

- 22. Plantation of one microplantlet/ hill was found better as there were less number of <3g minitubers. Upper half of microplant produced 5% less <3g minitubers as compared to lower half segment and full plantlets.
- 23. Sowing and transplanting date were optimized for hybrid seed production of capsicum and LD onion for bulb-to-seed method

C Number of Trainings, Demonstrations and Beneficiaries

Crops	Achievements			
	No. of trainings/ awareness camps/ Demonstrations	No. of Demos	No. of beneficiary	
Vegetables	5	8	154	

3. Central Institute of Temperate Horticulture (CITH), Srinagar, J&K

A i. Production of nucleus/basic seed and planting material

Fruits

In temperate fruits and nuts (apple, almond, walnut, pear, peach/nectarine, plum, apricot, cherry, strawberry) and subtropical fruits (mango, guava, aonla, phalsa, ber, citrus, grapes and lemon) the following quantity of grafted/budded plants and clonal/seedling rootstocks and budwood have been produced for supply to farmers and development departments.

S.No.	Particulars	Target	Number (lakh)	Percent target achieved
1	Grafted/budded plants	3.50	2.52	72.00
2	Rootstocks	4.00	3.50	87.50
3	Budwood	4.00	4.50	112.50

Vegetables

The following quantity of quality seeds of vegetables varieties/hybrids seeds and seedlings of important vegetable crops have been produced and is being supplied to the farmers.

S.No.	Particulars	Target	Number (lakh)	Percent target achieved
1	Quality seeds of vegetables varieties	800 kgs	812 kgs	101.50
2	Potato tubers	5000 kgs	5000 kgs.	100.00
3	Vegetables seedlings	3.5 lakh	4.40 lakh	125.71

Saffron and ornamentals

In saffron, ornamental crops and mushroom the following quantity of corms, bulbs and spawn were produced and distributed.

S.No.	Particulars	Target	Number (lakh)	Percent target achieved
1	Saffron/flower/bulb crops	2.00 lakh	1.40 lakh	70.00
2	Mushroom	8000 bottles	8600 bottles	107.50
3	Bio Agents	800 kgs.	700 kgs.	87.50

B. Standardization of production and protection technologies

- ❖ IPM modules for tomato and brinjal were developed for control of major pests and diseases in Jammu region and 50 ha of area was covered under pheromone traps. IPM tomato field have fetched 20 to 30 percent more economical fruit yield than non IPM fields.
- ❖ Technology for trench cultivation of vegetables in perennial River beds of Jammu and different vegetables hybrids for trench cultivation have been identified.
- Low cost technology for cultivation of button and dingri mushrooms refined and popularized through demonstration.
- ❖ Diseases of honey bees have been identified and management strategies recommended.
- New value added products of horticulture produce standardized and popularized for women empowerment through short term trainings.
- Integrated farming system in horticulture using orchard grass-red clover-controlled sheep grazing standardized.
- ❖ Effective forecasting module for scab and alternaria leaf spot in apple is being developed.
- Standardized and popularized drip irrigation/ fertigation in fruits and vegetables.
- Minor fruits and high value vegetables were evaluated and value added products developed and are being popularized for higher farm income.
- Standardized water harvesting, moisture conservation and rejuvenation technologies in almond under Karewa conditions of Kashmir valley.
- Standardized production technology and identified varieties and hybrids of tomato, capsicum and cucumber for protected cultivation under polyhouse and disseminated among farmers.
- Maturity indices were developed for harvesting at optimum oil content in olive.
- Exotic and indigenous varieties of Daffodils are being evaluated for identifying elite genotypes for commercialization.
- * Mass production of bioagents and their popularization under IPM module is in process.
- ❖ IDM of saffron corm rot and chilli wilt standardized and are being demonstrated.
- ❖ IPM module management of nut crops has been standardized and is being demonstrated.

C. Technology Refinement and Trainings

Under trainings and demonstrations, till the end of November, 2011, 83 trainings and 94 demonstrations have been provided on advance production and protection technologies, new varieties/hybrids, crop diversification, propagation techniques, protected cultivation, low cost mushroom production, commercial cultivation of ornamentals, post harvest management, water harvesting, rejuvenation etc. From the above trainings as many as 3044 farmers/ unemployed youths/Extension officers etc. benefited. The impact analysis is being assessed.

Trainin	Trainings and demonstration conducted during 2010-2011				
S.No.	Particulars	Target	Number	% Target achieved	Beneficiaries
1	Trainings	100	83	83.00	2524
2	Demonstration	100	94	94.00	520
	Total	200	177	88.50	3044

4. Vivekananda Parvatiya Krishi Anusandhan Sansathan (VPKAS), Almora, Uttarakhand

A i. Production of nucleus/basic seed and planting material

The details of seed and planting material produced and distributed to State Government are as under:

S.No.	Crop name	Target (2011-12)	Achievement (2011-12)
Tempe	erate Fruits		
1	Apple	29400	To be produced during winter
2	Apricot	6000	-do-
3	Wild Apricot	2500	-do-
4	Kiwi	8000	-do-
5	Pear	8500	-do-
6	Peach	6000	-do-

5	Gladiolus	41,000 plants	1000*			
6	Tuberose	30,000 plants	Crop in field			
7	Rose	75,000 plants	Crop in field			
8	Alstromeria	1,000 plants	1000			
	Total	189500 plants and 225.5 Kg. seed	189500 plants and 17000 kg Seed			

B. Technology Standardization/refinement and disseminationProtected cultivation of Vegetables

- 1. 60,000 Vegetables seedlings produced and distributed to the farmers.
- 2. Evaluation of genotypes on both mulch and unmultched in three mandate crop viz tomato, capsicum and cucumber have been done.
- 3. 2 trainings on protected cultivation were imparted to farmers and extension personals.

Mushroom Production Technology

- 1. 14 demonstrations (Button, dhingri & milky) were conducted during April-September, 2011.
- 2. From the 5 training programmes 145 trainees were trained covering different aspects of dhingri and milky mushroom cultivation.

Deployment of entomopathogens and light traps for the management of Scarab acids in Uttarakhand hills

- 1. 191 light trap installed in 17 villages.
- 2. Conducted 34 farmers field school in 17 villages.
- 3. Conducted 17 farmers field days in 17 villages.
- 4. Covered 421 ha area for the management of white grubs.

Efficient water management through micro-irrigation system in terraced land for growing vegetables

- 1. Installation of MIS in 0.2 ha area
- 2. Three Training conducted benefiting 112 farmers
- 3. Polytank was constructed covering 350 m²

ICM in Litchi and Mango

- 1. Total 25 no. of demonstration conducted in different district of Uttarakhand.
- 2. Trainings/Farmers field days conducted-4

Dissemination of polytunnel technology for quality nursery raising and production of winter vegetable for the weaker section farmers of the district champawat (UK).

- 1. Conducted 26 demonstrations in Champawat district.
- 2. Covered 1.56 ha area.

On-Farm Sustainable Production and Dissemination of Fruits and Vegetables based farming system in Uttarakhand.

- 1. Fruit plantation (Sub-tropical, Tempeate)-3524
- 2. Spices production-100 plants of Tejpatta
- 3. Vegetable production-1.6 ha
- 4. Protected cultivation-10600 m²
- 5. Polyhouse construction and repaired-3+2
- 6. Polytank construction-2
- 7. Animal treated and dewormed-78+200
- 8. Trainings/Exposure visits-5 (159 beneficiaries)

Dissemination of growing off-season vegetables technology under protected environment

- 1. Conducted 176 demonstration covering 13.76 ha area on off season vegetable production technology.
- 2. Construction five polyhouses covering 500 m² floor area with five beneficiaries.
- 3. Organized three trainings benefiting 129 farmers.

Imparting training through on farm trials/front line demonstrations

Training-cum-demonstration programme for rural women to develop bio-village for cultivation of MAPs.

General awareness were created for the production of medicinal and aromatic plants, trade related activities and conservation of endangered/extinct of M&AP in their surroundings. Participatory farmers have come to know the importance and safe guarding the traditional knowledge based M&AP and their popularization.

Planned Honeybee pollination for Improvement in Horticultural crop production

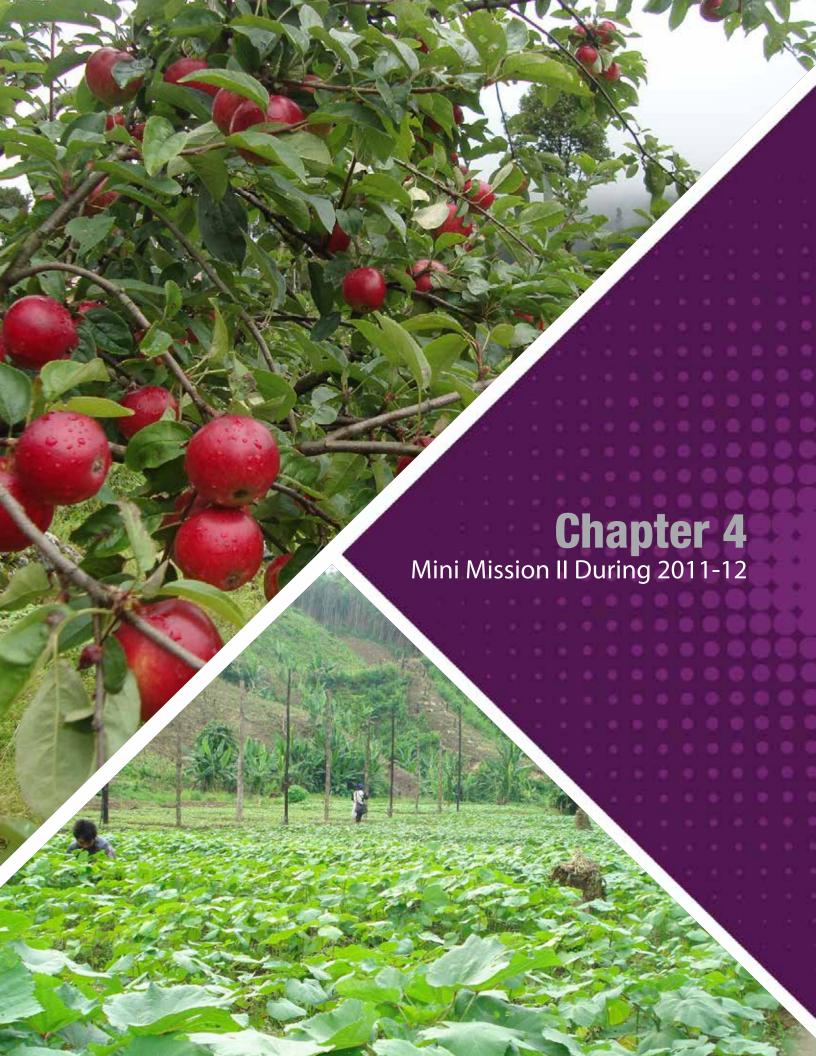

- 1. 128 wall hives treated.
- 2. Conducted 17 farmers field school in 19 villages.
- 3. Conduced 1 farmers field days in 19 villages.
- 4. Covered 22 ha area.

Status of horticulture and market opportunity in the state of Uttarakhand

- 1. Data has been collected from farmers and mushroom growers for assessing economic impact of vegetable cultivation and mushroom cultivation.
- 2. One training on "marketing of vegetables" and one field day for farmers' club was organized.
- 3. One Retail shop has been started for facilitating farmers club in selling their produce with the help of NABARD financial assistance.
- 4. Market survey has been conducted at Haldwani market from traders dealing with vegetable and fruits.
- 5. One farmers' club bagged state level best farmers' club award on April, 2011.

C. Technology transfer of crop regulation in guava

- 1. Conducted 7 demonstration on crop regulation in guava.
- 2. Organized 4 training.

CHAPTER 4 Mini Mission II During 2011-12

Production and Productivity

Area Expansion: The Implementation of the Mission has helped in bringing an Additional area of 55953 ha under various Horticulture Crops in North East and Himalayan States.

Fruits, Vegetables, Flowers, Spices, Aromatic and Medicinal Crops

Area (ha.)

S.No	State	Fruits	Vegetables	Flowers	Spices	Aromatic
1	Arunachal Pradesh	2139	1908	143	3967	_
2	Assam	2525	500	_	2300	_
3	Manipur	2600	1000	629	500	_

Total		11483

On Farm Water Management On farm water management programmes are aimed at diversifying the horticulture sector, ensuring higher production vis-a-vis better returns to growers. An area of 1229 has been covered with polyethylene mulch film for soil moisture conservation. The mission gave special thrust to protected cultivation of high value crops.

SI.No	States	Mulching (ha)	Green house (sqm.)	Shade net (sqm.)	Anti Bird/ Anti Hail Nets	Plastic tunnels (sqm)

Success Achieved in Crops : Tomato in protected condition and off-season cabbage

Crops Grown in Area : 1.56 ha

Before the intervention of Horticulture Department, he used to help his parent in traditional farming. After attending an awareness programme held in Namchi, he approached the concern Horticulture Inspector who in turns motivate to take up vegetable farming in a scientific manner. Considering his curiosity, he has given u.v. film for one low cost green house and hybrid seed of tomato indeterminate type along with technical inputs in first year. He has earned Rs. 15000 net from the 180 sq mtr green house. During off season he has given 75 gms of cabbage hybrid seed and earned Rs 14000. He was fully convinced with the technology and remain in touch with extension worker then onwards.

Brief Records of His/Her Progress after the Technical Intervention Imparted By Horticulture Department

Brief notes on inputs used for crops cultivations

Total

Considering his poor economic condition, concern HI started giving full technical and available input support to him. His believe and determination increased manifold. He is sincere and hard working. He was few cattle, pits and goats as source of manure, His strength of success is availability of ample water and FYM. He collects local biomass and put in cow shed to increase the volume of compost production. Sustainability his view and future Plan

Now, he is one of most progressive vegetable grower area. He is young and educated. In future he is planning to take up hybrid cauliflower production in off season (May — September). He wanted to develop his farm as a model scientific farm, where in he wishes to grow many vegetables all round the year. We wish him all success.

1,50,400.00

Conclusion

Technology Mission has really imparted benefits to the small farmers like Dawa Sherpa. With proper and acceptable technical intervention, many farmers like Dawa Sherpa could be made economically sound. We all wish, the Mission remains for many years to come.

Banana

Crops Grown in Area : 2.10 ha

Before the year 2001-02, he used to grow only maize crop in his entire field during kharif. In rest of the season field used to remain, wherein, cattle and goats of the villages used to pasture on it. He had no any source of income and was living in pathetic condition. He had to work as labourers to earn daily wages. He attended first awareness programme held at namchi. Immediately, next day, he approached in the office of Joint Director South, who has given lots of idea to earn livelihood through farming. He also instructed the concern Deputy Director and field staff to provide all possible supports. He has been invited to attend various trainings session and also sent to HTC Puna for training. As a result he is doing scientific cultivation of cherry pepper, tomato and rabi vegetable and earning his livelihood.

Alstomeria

1551 sq. mtr

Brief notes on his progress before the technical intervention imparted by Horticulture Department.

Mr. Dawa Zangpoo Sherpa was an educated unemployed youth. He tried Government Job for many years but all in vain. He attended an awareness programme held at namchi finally, he decided himself to enter in to the floriculture business. He had small piece of land, where in maize and some vegetables used to cultivate. He had no other source of income. Living has became difficult. Having knowledge of potential and scope of floriculture, he opted to take up alstomeria cultivation.

How to success achieved

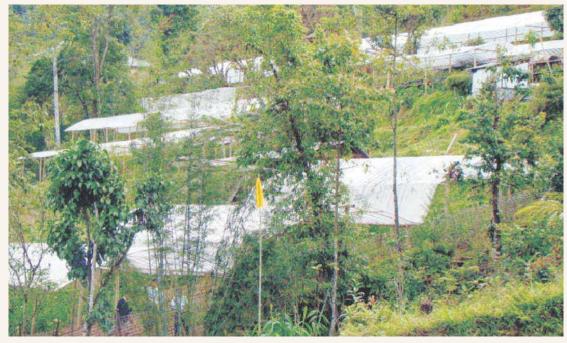

Considering his need, resources and his capacity, 500 nos. of alstomeria seedlings and a low cost green hose were provided. Technical trainings and practical in his own field were given for the cultivation of alstomeria. Being an enthusiastic and educated person he adopted technology quickly. He has planted 500 seedlings and sold the cut flowers in local market. Next year, he expanded his business and started producing planting materials through cuttings/splitting technique. He sold 3000 planting materials Rs 60 per plant locally. At present, he is one of the biggest alstomeria growers in the area. He has also started

cymbidium from this year. At present, he has eight low cost green hose. Now he has become economically sound.

Now, he has become a source of inspiration to other educated unemployed youth. He is selling seedlings locally and many alstomeria growers are coming up in the locality.

In future, he wants to establish multi flower nursery of his own. He always extends his thanks to the Department for the effort and support extended to him.

A view of Mr. Sherpa's farm

Name of Farmer : Shri Girman Dahal
Father Name : Shri Lall Bahadur Dahal

Age: 35 YearsEducation Qualification: Class XIIProfession: FarmerVillage: Nesa

Name of GPU : Arithang-Chongrang, West District

District : West
Total Land Holding : 4.0 Ha
Total Nos of Family Members : 4

Success Achieved in Crops : Cabbage 0.4 ha, Broccoli 0.4 ha, Peas 0.5 ha and Tomato

in greenhouse.

How he made the progress

After taking voluntary retirement from CISF, Shri Dahal needed alternative means of income for his family. Eariler, he used grow maize, millet and mustard in his field which did not give him good returns. Therefore, to increase his income, he thought of diversification of crops by choosing cultivation of off-season vegetable. He attended farmers' trainings, went on exposure trips in other growing areas of the state acquire knowledge on package of practices. He started cultivation of cabbage, broccoli, peas and tomato in greenhouse during off-season. His return from production of vegetable during 2008-09 is as under.

Crops	Production (Qtls)	Returns (Rs)
Peas	50.00	1,00,000.00
Cabbage	90.00	90,000.00
Tomato	20.00	60,000.00
Broccoli	15.00	45,000.00
Total		2,95.000.00

Technical Intervention

The Department provided him with trainings, hybrid/improved varieties of vegetable seeds, organic manures, bio-peticides/fungicides, spraying machines, poly pipes for irrigation and constant visit by field functionaries/ officials to suggest/advise him various aspects of vegetable production.

Conclusion

Through the interventions of the Department, Mr. Dahal has been able overcome his financial problems and has improved his economical conditions also. He has become one of the model farmers in the area and the Department is using his experience and knowledge as master trainer to train other farmers.

SUCCESS STORIES

Name of Farmer : Shri Laxmi Bista

Age : 33 year Education Qualification : Graduate

Profession : Farmer Village : Hee

Gram Panchayat Unit : Hee Patal, West District

Total Land Holding : 5.5 ha
Total Nos of Family Members : 4

Crops Grown in Area : Large cardamom nursery; 1.5 ha

How he made the progress

After graduation, instead of seeking for white collar job, he approached the officials of the Horticulture Department for suggesting him to take up suitable crops for better earning. The department official visited his field and considering all the factors came to the conculsion that establishment of nursery for large cardamom was found to the best options. Mr. Bista was provided with all the assistance under technology Mission for establishment of cardamom nursery under Private Sector. During 2008-09, he sold 3 lakh number of quality seedlings of large cardamom @ Rs 2.00 per seedlings thereby earning Rs. 6.00 lakh. He was very much happy to receive such a huge amount. Now he is determined to take up other horticultural activities also as he is convinced that horticultural crops are the most beneficial to the farmers.

SELF HELP GROUP OF LADIES TRAINED IN FRUIT AND VEGETABLE PROCESSING

Four ladies of village Kultoora (Handwara) District Kupwara were trained in fruit and vegetable processing in 2007-08. They established an unit, registered it with District Industries Kupwara as Malik Enterprises. Procured tomato fruit from their own village in 2008-09, made tomato purie from it and earned Rs. 80000. The target for the year 2009-10 has been fixed at Rs 5.00 lakh.

CONVENRSION OF LAND UNDER CANNABIS (BUNG) INTO APPLE ORCHARDS IN DISTRICT SHOPIAN

140 hectares of land under cultivation of cannabis (bung) at village Melhur (Zainapora) District Shopian has been converted into Apple orchards during 2008-09 after motivating the land owners by the field functionaries of the department.

CREATION OF IRRIGATION INFRASTRUCTURE BY LAYING PIPE SYSTEM

One four inch dia-pipe system has been laid in village Tulran (Imam Sahib) District Shopian during 2006-07. The source of water lying in deep gorge has been trapped into the pipe system. This has irrigated 250 Kanals of orchard area located at Kerewa. The irrigation system so installed has improved quality of fruit during 2007-08 and 2008-09. This achievement has become an eye opener to visitors.

INDUCING FRUIT BEARING IN OLIVE ORCHARD LOCATED AT CHENANI UDHAMPUR

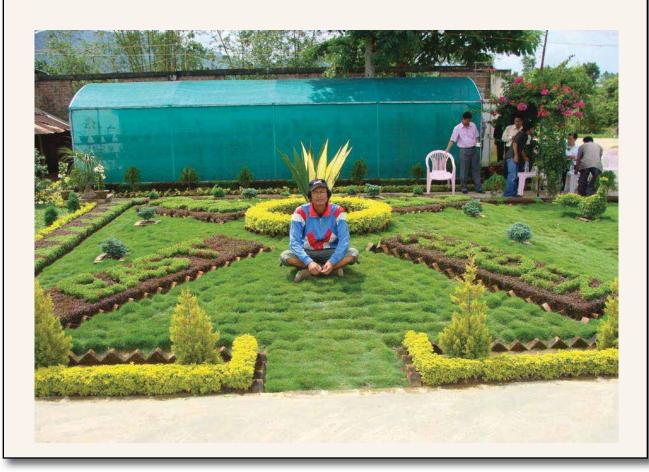

1.5 hactares of land was brought under olive plantation at Chenani in 1992. Due to lack of irrigation facilities the orchard did not bear any fruit. One water storage tank has ben constructed in the orchard during 2005-06, since then the orchard has been bearing olive fruit regularly.

ESTABLISHMENT OF TWO FRUIT PLANT NURSERIES UNDER PRIVATE SECTOR IN DISTRICT SHOPIAN FOR EMPLOYMENT GENERATION

Year establishment	: 2005-06	
Area covered	: 0.2 hectare each	
Expenditure incurred on input material	: Rs. 33820 and Rs. 33840	
Kind/No. of plants produced	: Apple = 9200 Nos. and 10100 Nos.	
Income generated	: Rs. 184000 and Rs 202000	

"EAST GARDEN" A NEW VENTURE OF FLORICULTURE

Shri Khuraijam Indrajit Singh, a BSC degree holder, aged 56 years, an inhabitant of Kongba Maisnam Leikai was a farmer of paddy cultivation. Usually, he used to keep his field unutilized after paddy cultivation for every year. But, after the construction of two small units of Shadenets & Green houses in his private field by the Department under TMNE, during the year 2007-08 he started cultivation/plantation of flowers like Anthurium, Gerbera, Roses and Dendrobium Orchids under controlled condition. Moreover, many other medicinal & ornamental plants are also raised in his Nursery and supplied to many agencies/firms. Now, he can earn more than three lakhs for every year by selling the cut flowers of Roses, Anthurium and Dendrobium Orchids in special. Now, he is a proud father of two sons and rendered employment of five unemployed youths of his locality and live with a happy family life. He becomes a pioneer in cultivation of flowers under controlled/open condition in the state of Manipur.

SUCCESS STORIES

VEGETABLE

Sri L. Dinamani Singh, a farmer by profession from Wangoi Thounaojam leikai, Imphal West district, Manipur started vegetable cultivation from the year 2006-07 in his small kitchen garden. But during the year 2007-08 he started cultivation of both winter and summer vegetable crops in his field after paddy which he usually kept in fallow.the seeds were provided by the Department of Horticulture and Soil Conservation, under technology Mission A/E programme and earned more than 75,000/ in his small plot of one acre area. During the year 2008-09, Sri Singh expanded his area of cultivation of cabbage in an .area of two ha by the seeds and other inputs like NPK, organic fungicides, etc., given by the Department. Thus he can earned more than two lakhs during a short period of three-four months. Now, he is trying to purchase a power tiller from his income under subsidized rate of TM. Sri Singh has expressed with repentance that he should have started this business a long back just at the start of TM in Manipur. Now, he is trying to develope a big farm house during this coming season. He is a motivator in his village and many farmers are also inspired for cultivation of vegetable crops.

VEGETABLE

Sri L. Helendro Singh of Kangmong Meisnam Leikai, Imphal West also started cultivation of vegetables just after the paddy in open condition.usually he left his field unutilized during the off season of paddy. During the year 2008-09, he started cultivation of more than one ha in his field. The Departmental staff of imphal west encouraged him by giving all possible helps like seeds, organic insecticides, fertilizers, etc., now, he is earning about two lakh in his plot for every year. Now, he is a proud farmer in his locality.

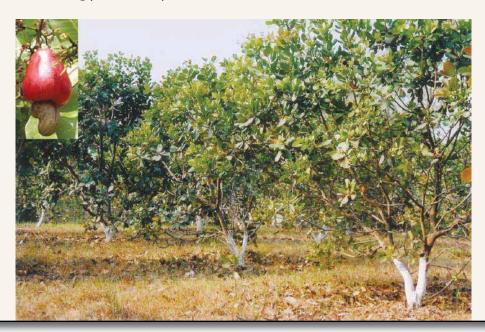

ASSAM LEMON HEADING FOR EXPORT

- The Department of Horticulture, Assam is duty bound to be crop specific, location specific and technology specific in implementing the scheme of Horticulture Technology Mission.
- Accordingly, considering the commercial prospect of Assam Lemon (Citrus limon L.), Nagaon district was selected for associating farmers for cultivation of this crop in a massive way.
- Since 2003-04, so far an area of 455 hectares involving 32 nos. of Growers Societies are covered under this crop in this district alone so far.
- Production has started but the problem is with marketing as the middle man offered only Rs. 20-25 /100 nos.
- The necessity of such market intervention came up from at least 3 districts and help of ASAMB, APEDA and NERAMAC was sought for by the Directorate.
- Finally, Shimla Hills Offerings Pvt. Ltd. with export outlook has come up for contractual farming under buy-back arrangement with the Growers Societies.
- They made a field survey on 27-02-2009 and happy with the excellent quality of the fruits.
- In the meantime, Assam Lemon Growers has formed a society viz. "HORTFED" which is being registered and tie up with the company is being attempted.
- Subsequently, the District Administration has decided to set up one processing unit in Nagaon under SGSY as a second line of support to the growers of this crop to go for semi processed products.
- Thus, after successful entry into the Potato sector with Public Private Partnership (PPP) mode, it is Assam Lemon now, the district is heading for.

CASHEWNUT

- Keeping in tune with the aim of location, crop and technology specific in implementing the scheme of TMIDH in Assam, Dhubri district was identified as one of the model district for commercialization of Cashew sector.
- Area Expansion programme was undertaken since 2003-04 and so far 425 hectare is covered under this
 crop under TMIDH besides an already existing area of 70 hectare. There are 13 processing units running
 in the district.
- A major hurdle of non-availability of elite planting material within easy reach of farmers was a big challenge.
 The department deputed a group of enthusiastic Cashew grower to train them in Nursery Management in Orissa.
- It was extremely fruitful. They have set up Olivia Nursery with mission support and now they are annually producing 1,40,000 grafts of elite varieties like V-4 and Ullal 2. The nursery is recognized by Cashew and Cocoa Board. The local ADO was instrumental for successful implementation of the scheme.
- Crops planted earlier have started bearing and the growers are getting 3-4 kg per plant in this initial phase. There are 26 nos. of Growers Societies associated with Cashew sector in the district alone.
- Director, Cashew and Cocoa Development Board, Govt. of India after visiting the district has suggested
 for modernizing processing units as well to go for processing Cashew Apple and Cashew Shell based
 extraction units to enhance profitability.
- Assam has identified 5 districts to boost up Cashew sector and has covered 22,000 hectares so far from mere 50 hectare during pre Mission period.

CASHEW NUT

Cashew has been immerging a very important crop as it earns a good foreign exchange about Rs. 2515 crores by exporting 1.15 lakh MT of cashew kernels during 2005-06; hence it is called a Dollar earning crop. The soil and climatic condition of Assam is very conducive for cultivation of this high value crop. Cashewnut cultivation was first initiated during the year 1998 under a central sector scheme.

Sri Brajabashi Koch, a very poor educated farmer of a remote village Manjuri, Mancachar in the district of Dhubri situated near the Indo-Bangla international boarder. He started cultivation of Cashew during the year 2001-02. He received 200 nos. of V-4 grafts from the department and could survive 120 of them. During the visit of the Deputy Director, Directorate of Cashew and Cocoa Development during 2006 he was advised to start a Cashew nursery using his mother plants as scion bank and by using local cashew seedlings available at Mancachar as root stock. At present his mother plants increased upto 460 nos. under assistance from Horticulture Technology Mission (V₄-373 nos. & Ullal-2-87 nos.) He was also provided with shade net for the purpose. His mother plants cover a land of 1.50 ha. During 2006 his nursery was registered as 'M/S Olivial Cashew Nursery' and it was recognized as 'Regional Cashew Nursery' by the Directorate of Cashew and Cocoa Development, Cochin. Sri Brajabashi Koch has already produced 51,000 nos. of quality grafts and earned handsome amounts of Rs.11.00 lakh. He engages 6(six) skilled persons regularly besides 20 nos. of daily laborers in various nursery activities. At present he has a stock of 60,000 grafts in his nursery. His total production capacity of Cashew grafts is 1,50,000 nos. at present. He supplies a major part of the total requirement of the State under TM-IDH.

Besides producing grafts he also earns a good amount of money, i.e., Rs.40,000.00 (Rupees Forty thousand) annually by selling raw cashew nuts to the local industries.

He had participated in many trainings on cultivation of Cashew organized by the Department at Dhubri and has undergone a special training on Cashew grafting at M/S Trupty Nursery, Orissa and Orissa University of Agriculture and Technology under the scheme of Horticulture Technology Mission. His nursery was visited by the Horticulture Commissioner, Govt. of India and appreciated his endeavour and encouraged to produce more grafts. Recently training was organized by the 'Central Institute of Horticulture' Nagaland for 100 farmers in his village and practical demonstration was conducted in his nursery. The Director of CIH appreciated his works.

OLIVIA CASHEW NURSERY (Regional) Manjuri, Mankachar - 783 131, Dhubari, Asom

ORANGE REJUVENATION

RANGE is one of the major fruit crop in Assam and to revive the decline orchards a massive rejuvenation programme was under undertaken with mission support from 2006-07. One of such programme was undertaken in Bangaon area of Kamrup district covering an area of 300 hectare. Farmers of those areas were supported with training, plant protection chemicals, manual equipments, water retaining granules and water soluble fertilizers etc. The rejuvenated garden gives excellent results and is stated below.

Existing garden (Pre- project)	Rejuvenated garden (Post-project)
Problem of trunk and shoot borer	Minimize the problem below ETL
Immature fruit drop	Successfully minimized
Lack of Technical know-how	Trained with latest technology
Poor plant growth	Plant growth improves sizably
Suffer drought like situation resulting poor return	Application of water holding granule and water soluble fertilizer shows excellent results
Nos. of fruits per plant – 300 (approx)	Nos. of fruit per plant – 800 (approx)
Cost per hectare – Rs. 15000/-	Cost per hectare – Rs. 60000/-
Price per fruit – Rs. 1.00	Price per fruit – Rs. 1.50 to 2.00
Net return – Rs. 90000/-	Net return – Rs. 300000/-

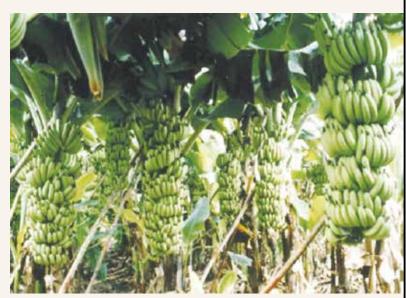

BANANA

Sri Pankaj Rabha, Sri Bipul Boro, Sri Krishna Kanta Boro, Sri Majit Rabha and Sri Bipul Rabha of Vill. Jabepara under A.D.O. Circle Boko, of Kamrup district formed a group namely 'Banana Growers Society" and planted Malbhogh variety Banana in 30 ha of land during the year 2007-08 under TM-IDH. They were trained on modern methods of Banana cultivation in Jalgaon. The total expenditure incurred and profit earned by the group is as follows-

Total expenditure:

 Tractorization, pit making, planting materials, Fertilizer, manure, fencing, irrigation, etc., Rs.13,50,000.00

 An amount of Rs. 3,73,500.00 (Rupees Three lakh seventy three Thousand five hundred) only was paid to him as grant being the 50% of the cost incurred by him for vermicompost unit, drip irrigation Tube well and plastic mulching expenditures were incurred by him.

Total income

• Nos. of bunches sold-10,000 @Rs.200.00	= Rs.20,00,000.00
• Nos. of suckers sold – 25,000@Rs.4.00	= Rs.1,00,000.00
• Nos. Spadix sold 15,000 @Rs.2.00	= Rs.30,000.00
Total	= Rs.21,30,000.00
Expected income during May-June-09	
Selling of suckers-30,000 nos. @Rs.4.00	= Rs.1,20,000.00
• Selling of bunches-30,000 nos. @ Rs.150.00	= Rs.45,00,000.00
• Selling of spedicks-30,000.00 @ Rs.2.00	= Rs.60,000.00
Total-	= Rs.46,80,000.00
Total income	Rs.21.30 lakh + Rs.46.80 lakh = Rs.68.10 lakh
Net profit earned Cost benefit ratio	- Rs.68.10 lakh- Rs.13.50 lakh = Rs.54.60 lakh -1:5.04

TURMERIC

Two educated youths of village, Dubi of Lakhimpur district formed a group namely 'Dubi Turmeric Growers Committee' together with nine others and availed assistance under the Mission for cultivation of Turmeric in an area of 10 ha. during the year 2008-09. Prior to starting cultivation the beneficiaries were trained on modern package and practices of crop by the Department. They planted Lacadang variety of Turmeric. The total expenditure incurred by the group including mission assistance and profit earned is depicted below-

- Cost of Tractorization, leveling, application of organic manure, fertilizer, planting materials, fencing, irrigation etc. –Rs.3.2438 lakh
- An amount of Rs.1.30 lakh was released to the group as 50% assistance
- Total income:
- Total production of Rhizome for sale: 3000 qtls
- Sold @Rs.400.00/qtls
- Total income Rs.12.00 lakh
- Net profit earned Rs.12.00 lakh Rs.3.2438 lakh
 = Rs.8.7562 lakh

The Group being very much encouraged on their performance has planned to expand their area by upto 85 bighas during the next season.

GINGER

Azarguri Kulamua Ginger Growers Committee of Lakhimpur district availed Govt. assistance under the Mission for cultivation of Ginger in an area of 17 ha covering two villages namely Azarguri and Kulamua. The preferred Nadia and Moran variety of Ginger for plantation. Departmental officers imparted training on modern methods of cultivation of Ginger. The total expenditure incurred by the group is as hereunder-

- Cost of Tractorization, leveling, application of organic manure, fertilizer, planting materials, fencing, irrigation etc. –Rs.4,74,691.00 lakh
- An amount of Rs.2,21,000.00 lakh was released to the group as 50% assistance
- Total income generated:
- Total production of rhizome for sale: 515 qtls
- Sold @ Rs.1600.00/ Otls
- Total income generated: Rs.8,24,000.00
- Net profit earned: Rs.8,24,000.00-Rs.4,74,691.00 = Rs.3,49,309.00

The Group has sold part of their produced rhizome as planting materials to other ginger growers of the district

M/s Sakshi Agro Beverage

BASIC INFORMATION ON SAKSHI AGRO BEVERAGE UNDER VENTURE CAPITAL ASSISTANCE SCHEME OF SFAC

Name of the promoter	M/s Sakshi Agro Beverage, Partnership Firm
Location	Plot No. D, Silver Drops Industrial Complex, Village Sila Mohekhati, Amingaon, Guwahati-781031, District Kamrup, Assam
Year of implementation	2007
Name of Product	Carbonated natural fruit juice/beverage processing unit.
Total Project cost	Rs. 874.78 Lakhs
Name of Financing Bank	United Bank of India, Panbazar Branch, Guwahati
Performance	The unit had gone commercial production w.e.f. 1st October, 2010 and primarily producing Mango drink and Litchi drink. As reported, the promoter have so many dealers and distributors in major cities and towns of NER states for marketing of their produce apart from direct sell.
Remarks	The promoter has received Rs. 75 Lakhs only as SFAC's Venture Capital Assistance, apart from MOFPI subsidy of Rs. 292.04 Lakhs and successfully running the project.
